

- Enter PIN to disable the security of the Blink App
 - Tap the Button in the Blynk App
 - The Blynk App is connected to the Esp2866 module to send the data.
 - The Esp2866 module is connected to the Arduino Uno which is connected to the Servo Motor to operate.
 - The Servo Motor operates to lock and unlock the door

- Tap the RFID tag to the RFID module.
 - The RFID module is connected to the Esp2866 module to send the data.
 - The Esp2866 module is connected to the Arduino Uno which would verify the ID/data that was sent.
 - The Arduino Uno is connected to the Servo Motor to operate.
 - If the ID is in the database of the Arduino Uno
 - The Arduino Uno sends a notification to the Esp2866 that the ID is registered.
 - The Servo Motor operates to lock and unlock the door
 - If the ID is not in the database of the Arduino
 - The Servo Motor does not operate.
 - The Arduino Uno sends the data to the Esp2866
 - The Esp2866 sends a notification to the Mobile Device.
